In recent years, a touch panel mounted on a display device such as a display of a personal computer or a tablet computer has been widely used. A user performs an operation on the display device by touching, with the tip of the finger, an image displayed on the display device with the touch panel. For example, when a gesture such as a moving operation of the finger is detected on the touch panel, the operation is applied to a displayed content. There is a type of display device which detects a gesture of the finger not only by the touch panel but also by a touch sensor disposed on the display surface. For example, the display device disclosed in Japanese Patent Application Laid-open No. 2012-221640 detects a gesture by the touch sensor disposed on the display surface while an area of a touch area is changed based on the state of the finger.The present invention relates generally to a camshaft adjusting unit for adjusting the position of the camshaft in a crankcase ventilation system with an induction pipe and a gas exchange valve. From the field of crankcase ventilation, camshaft adjusting units are known. DE 198 16 999 C1 shows an adjusting unit, in which the camshaft is fixed to the cr

This article explains how you can pair your iPhone to your car and use it as a Bluetooth stereo system. It is very important that you have this feature checked on your iPhone – it should be turned on. Go to the 'Settings' application, select 'General' and then 'Device'. On the 'Device' page, check if Bluetooth is turned on. Next, open the audio settings on your iPhone (if it has one) and choose 'Bluetooth device'. Follow the instructions to connect with your car. You can also pair your iPhone with a Bluetooth-enabled speaker, but it won't work as a stereo system. With your iPhone as a Bluetooth stereo system Once you have installed your iPhone in your car, you can use it as a Bluetooth stereo system. For this purpose, you will need an amplifier. There are plenty of Bluetooth amplifiers available on the market – simply connect it to your car and you will be connected to your iPhone and the music from your music player. It's quite easy to install, and you can even buy it on eBay. You can make it wireless if you want to control it from your iPhone. Bluetooth amplifiers are not always available on the market and can be tricky to find. If you can't get it easily, you can add another connector to your iPhone – you will need a digital-to-analogue converter (commonly known as an audio jack splitter). This way, you can connect two audio jacks to a single iPhone. You can also install the same audio jack splitter to an amplifier and a pair of speakers. You can buy a variety of audio jacks, which can vary from stereo to RCA to Apple Jack f678ea9f9e
